

## 22-DE-104+

PC/104Plus Breadboard

The 22-DE-104+ board gives you prototyping space in a PC/104-Plus stack. The board provides a grid of 0.038" holes and 0.070" pads on 0.100" centers. It is available in assembled or as a bare board.

The board is available with Press-Fit pass-through connectors installed, or as a bare board.
