

The BX-DE-63/104-RB board allows a single ISA board to be used in a PC/104 stack with the ISA board parallel to the individual PC/104 boards.

This board is available in three other versions - the only difference being the relative location between the PC/104 connector and the ISA connector.

See the following items for all variations of this board:

- W-26: BX-DE-63/104-RA (PC/104 to the left)
- W-27: BX-DE-63/104-RB (PC/104 to the right)
- W-31: BX2-DE-63/104 (PC/104 at the end)
- W-78: BX-DE-63/104-RC (PC/104 at the center)
