

DOUGLAS  
ELECTRONICS  
INC.

**22-DE-65**  
PCI Breadboard

The 22-DE-65 is a breadboard for creating your own PCI interface boards. The entire surface is filled with pads on 0.100" centers. Each pad is 0.070" diameter with a 0.038" plated-through hole. The component side has a Ground-plane and the solder side has a Vcc plane.
