6-DE-65/1104R
PC/104Plus <—> PCI Board
Interface

6-DE-65/1104R
W-65

The 6-DE-65/1104R board provides a slot for a PCI board which is in parallel plane to the PC/104 boards, but then allows a PC/104 board (not PC/104Plus) to be placed above the PCI board. (There is no mechanical support for the two PC/104 holes that are over the PCI board.)
