

The 6-DE-265/104RSD23 board is identical to the 6-DE-265/104RSD (W-45) board except that it is configured to be PCI slots 2 and 3. (The 6-DE-265/104RS board is configured for slots 0 and 1.)

This photo is actually of a 6-DE-265/104RS; however, except for the lettering on the board, you can not see any difference.
